DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 5 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 5 introduces the new limitation that "the concave portions of the driving head has an arc-shaped shape", and claim 7 introduces the limitation that "a linear gap is formed between each of the tree protruding portions and the respective concave portion", however, the examiner finds no support for either of these limitations in the disclosure.
- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1, 2, 4-7, and 9-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 5. The term "larger spaced distance" in claim 1 is a relative term which renders the claim indefinite. The term "larger spaced distance" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one

Art Unit: 3723

of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 103

- 6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 7. Claims 1, 2, 4-6, and 9-15, as well as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsieh (5,865,074), Tanner (5,983,758), or White (5,307,713), in view of Vogel (6,082,227).

Hsieh ('074), as discussed in the first office action, discloses a driving head of a wrench having protruding portions for capturing or preventing a nut from passing through the drive head. Hsieh ('074), furthermore, teaches that the number of resting portions and concave portions may be 4, 6, 8, 12, 16 or 20. Tanner ('758), also previously relied upon, similarly discloses a plurality of resting portions. White ('713) discloses the provision of resting portions for preventing a nut from passing through the drive head. The protruding portions of Hsieh ('074) have a semi-circular shape. The protruding portions of Tanner ('758) are triangular. White ('713) teaches that the protruding portions may have various forms, including a small rod 6, square tabs 8, and triangular tabs 11. Thus, Hsieh ('074), Tanner ('758), each White ('713) disclose the concept of providing a plurality of protrusions formed about one end of an opening of a driving head of a wrench, and taken as a whole, alone, or in part, suggest that the number and/or shape of the protrusions would have been obvious. However, none of these references teach or suggest the provision of an indication means, e.g. different

Art Unit: 3723

colors, or color-coding, on the protrusions. As applied in the first office action, Vogel ('227) teaches that it would be desirable to provide an indication means via color for hand tools. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the tool of Hsieh ('074), Tanner ('758), or White ('713), as each have been respectively applied to claim 1 above, by providing a color coded system for the protruding portions of the tool, such as a system as suggested by Vogel ('227), wherein an operator of the tool may readily identify a particular tool for a particular application.

Response to Arguments

8. Applicant's arguments with respect to claims 1, 2, 4-7, and 9-15 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3723

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. Thomas whose telephone number is (571) 272-4497. The examiner can normally be reached on 7-4 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail can be reached on (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
